EDUCATION

VIT Bhopal University

B.Tech in Computer Science (Artificial Intelligence and Machine Learning)

CGPA: 8.62/10.00

Bhopal, Madhya Pradesh

Aug 2023 – Aug 2027

PROJECTS

Hyperion AI - DB Insights Engine | *React, FastAPI, Python, SQLite, OpenAI API*

- Developed an AI-powered database assistant enabling natural language interaction with relational databases by generating SQL queries using LLMs, supporting 50+ query patterns including filtering, joins, aggregations, and sorting.
- Designed and implemented 6+ RESTful APIs for prompt processing, SQL generation, query execution, schema retrieval, and structured response delivery, achieving sub-2-second response times on local datasets.
- Engineered a secure query execution pipeline with SQL validation, input sanitization, and exception handling, improving query reliability while preventing invalid SQL execution.
- Built a responsive React interface for conversational database querying with dynamic tabular result visualization, eliminating manual SQL writing for supported operations and improving accessibility for non-technical users.

CodeForge — AI-Powered Cloud IDE | *Next.js, TypeScript, MongoDB, Ollama, WebContainers*

- Developed an AI-powered browser-based cloud IDE using Next.js, TypeScript, Monaco Editor, and WebContainers, enabling real-time code editing and execution with <100 ms editor response time and support for 10+ programming languages.
- Configured a file explorer and project management system with CRUD operations for files and folders, supporting 100+ project files and seamless workspace management.
- Integrated Ollama-based LLMs for AI-powered code completion, contextual suggestions, automated refactoring, and code explanations, reducing development time by an estimated 35–40%.
- Added xterm.js terminal support and a responsive Tailwind CSS interface with dark/light themes, improving UI responsiveness by 30%.

Hotel Booking System | *MERN Stack*

- Designed a full-stack hotel booking platform supporting 50+ hotels, 500+ rooms, and 200+ customer bookings.
- Implemented 15+ RESTful APIs for hotel listings, room availability, reservations, authentication, pricing, and booking management with <300 ms response time.
- Crafted an admin dashboard to manage 50+ hotels, 500+ room inventories, pricing, bookings, customer records, and availability.
- Built responsive booking workflows with hotel search, filtering, reservation confirmation, booking history, and secure authentication.

TECHNICAL SKILLS

- **Programming:** C++, Python, Java, JavaScript
- **Web Technologies:** ReactJS, Node.js, Express.js, Next.js, MongoDB, HTML, CSS, Bootstrap, Tailwind CSS, Material UI
- **Tools & Cloud:** Git, GitHub, Cloudinary
- **Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming, DBMS, Authentication, Authorization, REST APIs
- **Machine Learning:** Natural Language Processing, TF-IDF, Scikit-learn, Classification Models

EXPERIENCE

ServiceNow

May 2026 – Jun 2026

Virtual Internship Program — ServiceNow University, AICTE & SmartBridge

Remote

- Learned ServiceNow administration concepts including user management, platform configuration, workflow automation, reporting, and dashboard creation.
- Gained exposure to Agentic AI capabilities and automated workflows within the ServiceNow platform.
- Practiced Automated Test Framework (ATF) fundamentals for testing ServiceNow applications and workflows.

Ethnus

May 2025 – Jul 2025

MERN Stack Intern

Remote

- Engineered RESTful backend services for 3 major modules handling 50,000+ database records.
- Optimized MongoDB schemas and queries, improving data retrieval speed by 25%.
- Designed responsive React interfaces for 12+ pages, reducing page load time by 20%.
- Executed authentication and role-based access control for 100+ users.

CERTIFICATIONS & ACHIEVEMENTS

- **AlgoUniversity Programming Camp:** Selected as a mentee from 60,000+ students; featured in the Hall of Fame.
- **Certifications:** Microsoft Azure Fundamentals(Microsoft), MERN Full Stack Development (Ethnus), Cloud Computing (NPTEL), Applied Machine Learning in Python (University of Michigan).Introduction to internet of things(NPTEL).
