EDUCATION

VIT Bhopal University

B.Tech in Computer Science (Artificial Intelligence and Machine Learning)

CGPA: 8.63/10.00

Bhopal, Madhya Pradesh

Aug 2023 – Aug 2027

TECHNICAL SKILLS

- **Programming:** C++, Java, Python, JavaScript, TypeScript
- **Web Technologies:** ReactJS, Node.js, Express.js, Next.js, FastAPI, MongoDB, HTML, CSS, Bootstrap, Tailwind CSS, Material UI
- **Tools & Cloud:** Git, GitHub, Cloudinary, Microsoft Azure
- **Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming, DBMS, Authentication, Authorization, REST APIs
- **Machine Learning:** Natural Language Processing, TF-IDF, Scikit-learn, Classification Models

PROJECTS

VibeCode — AI-Powered Web IDE | *Next.js 15, TypeScript, WebContainers, Monaco Editor, Gemini API, Prisma, MongoDB* | [GitHub](#)

- Built a browser-based AI-integrated IDE using Next.js 15 and WebContainers, supporting code compilation and execution across 6+ frameworks including React, Next.js, Express, Hono, Vue, and Angular.
- Integrated Google Gemini API (gemini-2.5-flash) with a local Ollama fallback for AI-powered code completion and context-aware project refactoring assistance, reducing inline completion latency by 45%.
- Implemented Edge-compatible NextAuth v5 authentication with Google and GitHub OAuth, along with Prisma and MongoDB for persistent workspace and project data.
- Integrated an interactive xterm.js terminal with WebContainer system shells and a custom file explorer, enabling zero-setup workspace creation and file CRUD operations within the browser.

Nexus Cart — Voice-Powered Shopping Assistant | *React, Node.js, Express, MongoDB, Gemini API, NLP* | [GitHub](#)

- Built a voice-driven e-commerce assistant using React, Node.js, and the Web Speech API for voice-based product interaction and real-time shopping state synchronization.
- Integrated Google Gemini API for NLP-based command processing, achieving 94% classification accuracy across item categorization, unit conversion, and localized price estimation tasks.
- Optimized MongoDB Atlas data operations using Mongoose upsert logic, reducing database query overhead by 30% while preventing duplicate shopping records.
- Developed an automated inventory restock scheduling system for 35+ products with exponential backoff and retry handling for API rate-limit constraints.

Full Stack Job Portal | *React, Node.js, Express, MongoDB, Remote API, JWT, bcrypt* | [GitHub](#)

- Developed a full-stack job search portal integrating the Remote API to ingest and index 1,000+ remote job listings alongside user-submitted entries.
- Implemented JWT authentication, bcrypt password hashing, and schema-level validation to secure user accounts and profile data.
- Built a responsive dashboard with debounced search functionality, reducing unnecessary API fetch calls by 40% and improving client-side performance.
- Deployed the React client on Vercel and Express API server on Render, separating frontend and backend services for independent deployment and scaling.

EXPERIENCE

Ethnus

May 2025 – Jul 2025

MERN Stack Intern

Remote

- Developed RESTful backend services for 3 major modules handling 50,000+ database records.
- Optimized MongoDB schemas and queries, improving data retrieval speed by 25%.
- Developed responsive React interfaces for 12+ pages, reducing page load time by 20%.
- Implemented authentication and role-based access control for 100+ users.

ServiceNow

May 2026 – Jun 2026

Virtual Internship Program — ServiceNow University, AICTE & SmartBridge

Remote

- Worked with ServiceNow administration concepts including user management, platform configuration, workflow automation, reporting, and dashboard creation.
- Explored Agentic AI capabilities and automated workflow development within the ServiceNow platform.
- Tested custom application logic using ServiceNow Automated Test Framework (ATF) configurations.

CERTIFICATIONS & ACHIEVEMENTS

- **AlgoUniversity Programming Camp:** Selected as a mentee from 60,000+ students; featured in the Hall of Fame.
- **Certifications:** Generative AI for All (Infosys), Artificial Intelligence for All (Infosys), Microsoft Azure Fundamentals (Microsoft), MERN Full Stack Development (Ethnus), Applied Machine Learning in Python (University of Michigan).
